---

Yes. I think we can say that the emergency response work will be done by the end of the day today. Based on the sample results we got from right under the highway, we will definitely have to do some more excavation directly under the roadway later this spring or summer. The RP finally understands that, though it took some repeated communicating because they somehow believed they were going to get out of it because it was under the highway. That has never been the case, but I think some earlier statements by ODOT led David, Rob et al to believe that. The ODOT district manager has convened a coordination call next week where I think we can resolve this. But, as far as EPA involvement, I think we can say we are done with the emergency response phase!

Signed. Thanks, Jamie.

Everything OK?
